## **Compressing databases**

In QuoVadis 6 databases will be compressed with the following steps:

- Please open QuoVadis 6 Xplorer
- put the cursor in the tree view on the list or a database, for example "My Data"
- click in the Icon button of the QV-Xplorer onto the left Icon "white container, database....)
- select "compressing"

-•- QV Xplorer			
9.	🗅   🏝 🚥 击 -   👗 🛍 🛍 🗅	🗙 - I 📀 🙆 🏠	2* 🗯 🕨
	Refresh		Name
8	Set database writable	Ctrl+Shift+W	Projects
	Set database readonly	Ctrl+Shift+R	Routes
	Set Automap of maptables	•	
	Connect Folder		
	Remove this connection		
	Connection frozen		
	Import TTQV3/4 Data		
	Compress		Save 147
	New QV-Xplorer window		Name:
Detach QV-Xplorer from mainwindow			
	🕀 🗐 BFU 2010	1	Info
	🕀 😁 My Data		Links
ter cess My Inps			Browser
	🕂 👹 Quo Vadis6		

... with this function the database "My-Data" will be compressed. Please repeat this for other lists or databases if necessary. With the compressing a file with the same name will be created in the list "QV6\_Data\qu6",which has the ending\*.qv5db.bak. This can be created newly by deleting the ending .<u>bak</u>, when there is a mistake in the original DB, or when a table/DB has to be read newly. (For that function QV has to be closed and started again!)
