

Installation, Start Menu and Updates

You can download QuoVadis Mobile for iOS from your App-Store.

Start Page

After starting QuoVadis Mobile via QVM-I-Icon on the home screen, the start page appears from which all functions are available:

[Map](#), [GPS](#), [Find](#), [Database](#), [Live](#) and [Help](#) (this Wiki)

As usual among iOS, QVM-I is closed by opening the App overview via a double click on the home button and then **wiping QVM-I upward**.

Info and Update

Via  in the upper right corner you see at **Info** the used version number of the App and you can access the global [Settings](#).
