

QVM-W3 Introduction

(QuoVadis Mobile for Windows 10)

QuoVadis Mobile is your **all-inclusive-App** when it comes to navigation, GPS and maps.

On-and-off-road, by foot, by bike or by car, you can take it everywhere you go and it is easy to handle.

Tracking allows live-broadcasting and presentation of current locations.

On-Road-Navigation

- Search quickly for addresses and then be guided turn-by-turn with clearly spoken instructions
- On the fastest or shortest route, by car or by foot
- Worldwide
- Internet connection required

Off-Road

- Direction and distance to the target or along a route
- The covered distance is displayed on the map and stored
- Navigation along a track

Tracking

- Share your location with others, follow locations of others on your map
- Just perfect in a group, when you want to know where other group members are
- Display of SPOT-Messages
- Internet connection required
- Send E-Mails with your current location

Maps

- Online-Maps, e.g. OSM, GoogleSat, BingTraffic, OpenWeather etc., expandable
- Export any maps from QuoVadis 7.1

Data Administration

- Administration in databases
- Clear presentation even of large data volumes
- Efficient Search-Function, Favorites
- Find tracks online at EasyRoutes¹⁾, GPSies und OSM-POIs
- Exchange data easily between all Apps of the QV/QVM-Family
- Per E-Mail, Cloud
- OneDirve and DropBox Support

And much more

- Create new routes on the way, record tracks and save new WP's
- Info field for additional descriptions and web links
- Import and Export of data by GPX format
- Coordinates in Wgs84 Lat-Lon or UTM
- Weather forecast for the current location and any point on the map
- Compass rose²⁾
- Times on the sun and the moon, twilight

QuoVadis Mobile W3 runs on all Windows Phones and PC with **Windows 10**.

¹⁾

For this purpose an account at "Motorrad- or Tourenfahrer" is necessary

²⁾

if supportet by phone
